***Response to Amendment***

1. This action is in response to communications filed on 4/05/2007. Claim 1 has been amended. Claims 6 and 9 have been cancelled. Claims 17-28 have been withdrawn. Claims 1-5, 7-8, and 10-16 are pending examination.

***Double Patenting***

2. Claims 1-5,7,8,10-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 09/817,353 in view of Roman et al and Haseltine '143. Roman et al. and Haseltine disclose obvious variants of the elements recited in claims 1-5,7,8,10-16.

This is a provisional obviousness-type double patenting rejection.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1-2, 7-8, 13 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Arganbright et al, US Patent No. (6,980,962) referred to hereinafter as Arganbright.

Art Unit: 3627

Claim 1: Arganbright discloses a method of using the Internet to provide return labels to customers for facilitating returns of merchandise, comprising the steps of: receiving, from a customer, an electronic request via a web access tool associated with the customer, the electronic request to initiate return processing of merchandise having been purchased by the customer in a prior purchase transaction, (see at least col.62. line 65-col.63 line 10);

In response to receiving the electronic request from the customer, accessing a database to obtain transaction information associated with customer, the transaction information identifying at least one item of merchandise having been purchased by the customer in a prior purchase transaction, (see col. 63 lines 8-11);

Displaying, to the customer via the web access tool, the transaction information comprising a list of the at least one item of merchandise having been purchased by the customer in the prior purchase transaction, (see col.63 lines 5-10);

Receiving an electronic selection, from the customer, via the web access tool, the electronic selection identifying a particular item of merchandise having been purchased by the customer in the prior purchase transaction, (see col. 63 lines 8-11);

In response to receiving the electronic selection from the customer of the particular item of merchandise having been purchased by the customer in the prior purchase transaction, generating data for printing a return label for the particular item of merchandise selected by the customer, (see col. 63 lines 29-35)

Claim 2: Arganbright teaches wherein the displaying step is performed by displaying a return information web page (see col.63 lines 5-10).

Claim 7/8: Arganbright teaches a method comprising the step of accessing a database to obtain merchant return rules, and displaying at least one of the merchant return rules, (see col.63 1-10).

Claim 13: Arganbright teaches the step of notifying a merchant of the return item, (see col. 63 lines 18-22).

Claim 15: Arganbright disclose downloading the data for printing a return label to the web access tool, (see col.63 lines 30-35).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-5 and 10-12, 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arganbright in view of Roman et al., US PG Pub. No. (US 2002/0010634 a1) and official notice.

RE: Claim 5, Arganbright does not expressly teach accessing a database to obtain customer information about the customer, and wherein the displaying step includes

displaying at least part of the customer information. However Roman teaches as evident by Roman accessing a database to obtain customer information about the customer (see pp 0016 line 3), and wherein the displaying step includes displaying at least part of the customer information (Roman disclose the offered replacement product and is read as part of customer information since it will reference the initial product). It would have been obvious to one of ordinary skill in the art to incorporate the teachings of Roman into the disclosure of Arganbright in order to make it convenient for the user or customer to be able to retrieve and view their information.

Re claim 10: Arganbright does not expressly teach the step of determining whether the return is valid prior to the downloading step. However Roman teaches the step of determining whether the return is valid prior to the downloading step (see pp 0016 line 2 submitted return is analyzed for fraud against a database). It would have been obvious to one of ordinary skill in the art to incorporate the teachings of Roman into the disclosure of Arganbright in order to prevent the invalid return of merchandise.

Re claim 11: Official notice is taken regarding the giving of notice that the request has been rejected and is made final. See e.g. US6192347 par. 517.

Claim 12: Arganbright does not expressly teach the step of performing the return is valid is performed by accessing one or more return rules associated with the merchant. However Roman teaches an e-tailer establishes parameter e.g. rules to determining

whether the return is valid, see pp 0016 Roman et al. It would have been obvious to one of ordinary skill in the art to incorporate the teachings of Roman into the disclosure of Arganbright the motivation being the same as in claim 10.

Claims: 14/16: Arganbright does not expressly teach the step of notifying a merchant of information about the customer, and the step of delivering data about the return to a customer account record. However Roman et al discloses a merchant is notified of the return item (Roman et al. disclose information about the customer that he is returning the product undamaged, by the processing center pp0022 line 8).

Claim 3,4 official notice is taken regarding the old and notorious practice of generating a confirmation of a transaction on a separate page. See e.g., US6497408 par. 64. This official notice is hereby made final.

#### ***Cited references***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to form 892 for cited references.

#### ***Response to Arguments***

8. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
